QA Engineer

Mark Kharytonov

Position: Junior QA Engineer

City: Kaharlyk, Kyiv region

Work format: I am considering remote work

Photo:

Basic skills

I have completed a course in manual QA and am now starting in IT. I don't have any commercial experience yet. Still, during my studies, I completed many practical tasks: I wrote checklists, test cases, bug reports, worked with APIs (Postman), databases (SQL), browser tools (DevTools), and organized work through Trello, TestRail, and Google Docs.

I have a good understanding of the software life cycle, quality requirements, testing levels, and types. I can compile test documentation, find and describe bugs, and write test reports.

Technical skills

Database server
• SQL server/SQL

• MySQL

Operating systems
• Microsoft Windows XP/7/8/10/11

• MacOS

Tools and technologies

• HTML/CSS/Xpath

• Jenkins

• CI

• Git

• Fiddler Everywhere

• Fiddler Classic

• SourceTree

• Jira

• KDiff3

• Postman

• Technical Documentation / SRS

• JSON

• XML

• MySQL

• Microsoft SQL Server Management Studio

- Selenium IDE

- REST API

- VS Code

- ADO

Others
- SCRUM

- Kanban

- Agile

- Waterfall

Soft Skills
- Responsibility and adherence to deadlines

- Ability to work with large amounts of information

- Teamwork (participation in daily stand-ups, sprint planning)

- Communication skills (ability to formulate questions and respond to feedback)

- Critical thinking and attention to detail

Experience

Project name:

ROI Traffic (NDA)

Description:

The project aimed to attract high-conversion paid traffic from sources (Facebook, Google) and redirect it to affiliate and direct offers from advertisers. The goal was to maximize return on investment through analytics, targeting optimization, and creative testing.

Tools & Technologies:
Facebook Ads Manager, Google Ads, Keitaro, Google Analytics, Anti-detect browsers, Multi-login systems, Proxy servers.

Project responsibilities:
Media Buyer / Traffic Acquisition Specialist

- Launching and optimizing paid ad campaigns via Facebook, Google
- Conducting deep A/B testing of creatives, landing pages, and funnels
- Using trackers (Keitaro) and analytics tools (GA, BI) to analyze performance
- Managing daily advertising budgets from $500 to $5000
- Working with affiliate networks and direct advertisers
- Analyzing key metrics: ROI, ROAS, CPA, EPC, CTR
- Implementing strategies with anti-detect tools and multi-account infrastructure
- Scaling profitable campaigns across GEOs (Tier 1–3)
- Mentoring junior media buyers and standardizing processes
- Automating reporting and optimization processes for better performance

Duration:
3 years (2022 – 2025)

Customer:
Worldwide – Affiliate Networks & Direct Advertisers (US, CA, EU, LATAM)
